Pleasant aroma

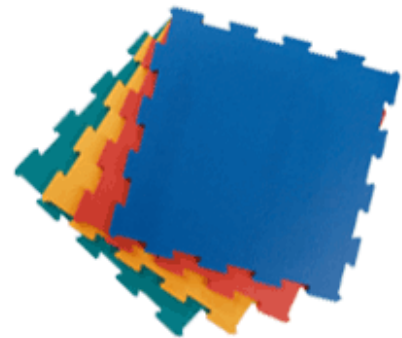

## Indoor play Tiles

The Indoor Tiles we are proposing are designed specifically with children in mind, Paviplay is the ideal flooring solution for children's playrooms and recreation areas.

Paviplay has been developed by The Protective Comfort Group a Spanish company that specialises in the development and manufacturing of indoor sports and technical flooring. With more than 40 years of experience in the industry, their commitment to the latest technological advances, superior design and excellent durability, Protective Comfort Group has become the world leaders in the specialized flooring industry.

Paviplay is the most advanced solution for flooring in children's play areas. The Paviplay tiles offer a safe, protective and comfortable environment. They are made from millions of tiny air bubbles to protect children from tumbles and falls, The tiles have a soft, textured surface and insulates against cold, damp floors. The air flooring releases a soft, lavender aroma, does not contain PVC, and possesses a patented anti-bacterial protector. The Paviplay tiles are ideal for nurseries, schools, kindergartens, day-care centres and all other places synonymous with children's play. They are easy to assemble, disassemble and store away thanks to its interlocking puzzle-like system, which enables you to create a play area in minutes. Although the tiles have a waterproof surface, can be cleaned easily with everyday household products perfect for those unwanted spills and accidents. As with all indoor flooring associated with children's play the Paviplay tiles are designed to be used without shoes. This is mainly due to hygiene and safety purposes.

**Tiles** - Paviplay are available in a jigsaw tiles. The come in three different thicknesses 15, 20 and 30mm and two different sizes 50cm x 50cm and 100cm x 100cm. The tiles adapt perfectly to any surface, big or small, and are available in a combination of desired colours. The individual interlocking system of the tiles allows you to adapt and change the play area according to your circumstances and needs. The tiles protect children from falls and bumps.

**Colours** – Paviplay soft textured tiles are available in blue, green, yellow, and red. The colours and textures contribute to the development of visual, tactile and spatial abilities of children. The smooth and pleasant surface makes it the most adequate place for both playtime and learning activities.

**Wall Protectors** – Paviplay also manufactures wall protectors that are recommended for play rooms as they provide children with the ultimate protection against falls and injury. The size wall protector mats is 150cmx100cm by 10mm thick.

## PROTECTION AND SAFETY

Paviplay tiles are made using safe and hygienic materials that include a fungicide and antibacterial protection. Paviplay tiles do not contain latex, thus avoiding any possible allergies, and does not contain PVC. This make the tiles ideal to be used in place such as hospitals.

Paviplay tiles have undergone rigorous safety tests in AIJU, the Toy Institute Technology Centre, obtaining a Head Injury Criterion (HIC) certificate which guarantees impact absorption, protecting children of all ages when they fall, and avoiding serious head injuries. Certification is as follows:

15mm	HIC 30cm
20mm	HIC 76cm
30mm	HIC110cm

All Paviplay products come with a 5 years manufactures guarantee. The warranty covers against manufacturing defects.

Paviplay is made with the Air Flooring Technology System, AFS, implemented in sports flooring to protect the athlete in the most demanding conditions.
